Product Description

EGO Power+ 30" Composite Armor™ Deck Deck Lawn Mower with Peak Power™ - LMX7600SP

The EGO Commercial 30" Composite Armor™ Deck Mower with Peak Power™ is the industry's most lightweight 30-inch walk-behind mower. Weighing just 116 lbs, it's up to 30 percent lighter than comparable gas mowers. Its dual 1000W brushless motors deliver up to 2 x 8.1 ft-lbs of torque for the power equivalent of a 230cc gas engine. Designed for heavy-duty professional use, its impact-resistant Composite Armor™ deck defends against dents, rust, and corrosion while delivering the strength of metal without the added weight. Its light weight makes it ideal for easy maneuverability along banked boulevards, sloped strips around parking lots, and ditches that are hard to cut with a heavier steel deck machine. Its deck features dual height adjustment levers across nine positions for refined airflow and the best cut quality in all conditions. An aluminum deck guard and IPX5-rated weather resistance rating provide uncompromised durability. Dual battery ports with Peak Power™ technology combines the power of any two 56V ARC Lithium™ batteries to deliver long runtimes and efficient power draw. Control blade speed settings and lights with the intuitive interface mounted to the thick steel handle set. Your investment is protected with a two-year commercial use warranty. Maximize uptime and grow your business with the powerful tools and smart tech of EGO Commercial.

TECH SPECS

- Dual 1000W brushless motors deliver up to 2 x 8.1 ft-lbs of torque—replacing a 230cc gas engine
- Lightweight, ultra-durable Composite Armor™ deck defends against dents, rust, and corrosion; up to 30 percent lighter than comparable gas mowers at just 116 lbs (tool only, no accessories attached or batteries inserted)
- Cuts up to 120 minutes with two 56V 10.0Ah ARC Lithium™ batteries (available separately)
- 16,000 FPM max. blade tip speed; adjustable across three speeds
- IPX5 weather resistance
- Dual cut height adjustment levers (9 positions; 1 inch to 5 inches) to rake the deck for refined airflow and best cut quality

- 2.5 bushel grass bag, bag frame, side discharge chute, and mulching insert included
 - Compatible with all 56V ARC Lithium™ batteries (available separately), recommended for use with two 56V 10.0Ah batteries for maximum performance
-
